Complete animation for digital artists!

The fun, quick and affordable way to create animations! Anime Studio is the ideal solution for first time animators, hobbyists and digital enthusiasts.

Create and Import Content - Create your own art using intuitive vector-based draw, paint and fill tools. Easily import artwork from popular graphics programs and use pre-built content to get started fast!

Bone Rigging Saves Time - Point-and-click to attach bones to your characters for easy manipulation and reduce production time over traditional frame-by-frame animation.

Advanced Timeline Control - Inverse Kinematics moves your character naturally between keyframes for smooth animations. Add sound, special effects, and preview in real time with multiple layers to edit your animation.

Create, rig and animate your figures with ease!

Simple interface makes animation easy!
